

Edible Playdough

Easy 2 Ingredient Recipe!

Edible Playdough Recipe

This is quick and very easy and delicious too!

The recipe is one-part frosting and one part of powdered sugar. You can use either a white frosting, flavored or colored frosting.

White frosting will allow you to make your own colors.

You will need:

- 1 cup of frosting
 - 1 cup of powdered sugar (cornstarch does work but is not as tasty)
 - Mixing bowl and spoon
 - Food Coloring(optional)
 - Playdough accessories or cookie cutters will do
1. Start by adding the frosting to your bowl
 2. If you want to add a few drops of food coloring now is the time. You can make separate bowls of each color
 3. Now add your powdered sugar to thicken your dough and give it that awesome playdough texture. Start with using the spoon but eventually you will have to switch to kneading it with your hands.
 4. If its very sticky you can add more powdered sugar. Once the mixture is fully incorporated you can remove the playdough and start playing!

Have Fun and Enjoy!
